Baseline M365

Your Effortless Security Solution

Comprehensive Protection Without the Hassle

Cyber threats are constantly evolving, and standard security measures may no longer be enough to protect your business. Baseline M365 provides proactive, automated security management, ensuring your Microsoft 365 environment remains protected—without requiring additional effort from your team.

This service enhances your current cybersecurity through continuously monitoring, assessing, and mitigating risks before they happen, keeping your business secure and compliant.

Why It Matters for Your Business

This product gives PTG more visibility into gaps in your business's Microsoft 365 security. We can more quickly identify and address potential security threats, ensuring that your sensitive data and activities are protected from cyber-attacks.

Unlike basic security monitioring, Baseline M365 provides:

▪Continuous Security Hardening: Regularly assess your Microsoft 365 environment against evolving security standards, promptly addressing new threats.

▪Hands-Free Management: Our team actively identifies, remediates, and prevents security issues on your behalf, reducing your team's involvement.

▪Cost Efficiency: By automating security tasks and providing a dedicated cybersecurity layer, we help businesses reduce the need for additional IT staff, lowering operational costs.

Ensuring Long-Term Security & Compliance

Baseline M365 doesn't just protect your business today—it continuously adapts to Microsoft 365 updates and emerging cyber threats, ensuring your environment remains secure over time.

Many businesses mistakenly assume that their Microsoft 365 tenant is fully managed when, in reality, administrative tasks like user creation and monitoring do not equate to comprehensive security hardening. Baseline M365 fills this gap, allowing us to proactively strengthen your security posture without disrupting your operations.

Key Benefits:

▪ **Simplified Security Configuration:**
With Baseline M365, PTG can quickly find and address security configuration issues on your behalf, when Microsoft makes a change to their systems or environment. This means your data and activities are better protected from potential threats.

▪ **Effortless Baseline Security:**
The tool allows PTG to quickly fix security vulnerabilities with just one click. This creates increased visibility ensuring that your systems remain compliant with security standards without you having to worry about it.

▪ **Automated Proactive Protection:**
Thanks to Baseline M365's unique technology, PTG can quickly integrate and start using Microsoft Security Manager to improve your protection immediately throughout all Microsoft applications.

▪ **Simplified Microsoft Stack Management:**
Microsoft makes constant changes from product upgrades to bug patches, and this tool allows us to stay ahead of Microsoft's changes and ensure that the products are aligned to a baseline security standard and address any vulnerabilities are identified in the process.
